

TRIEVA KİMYA

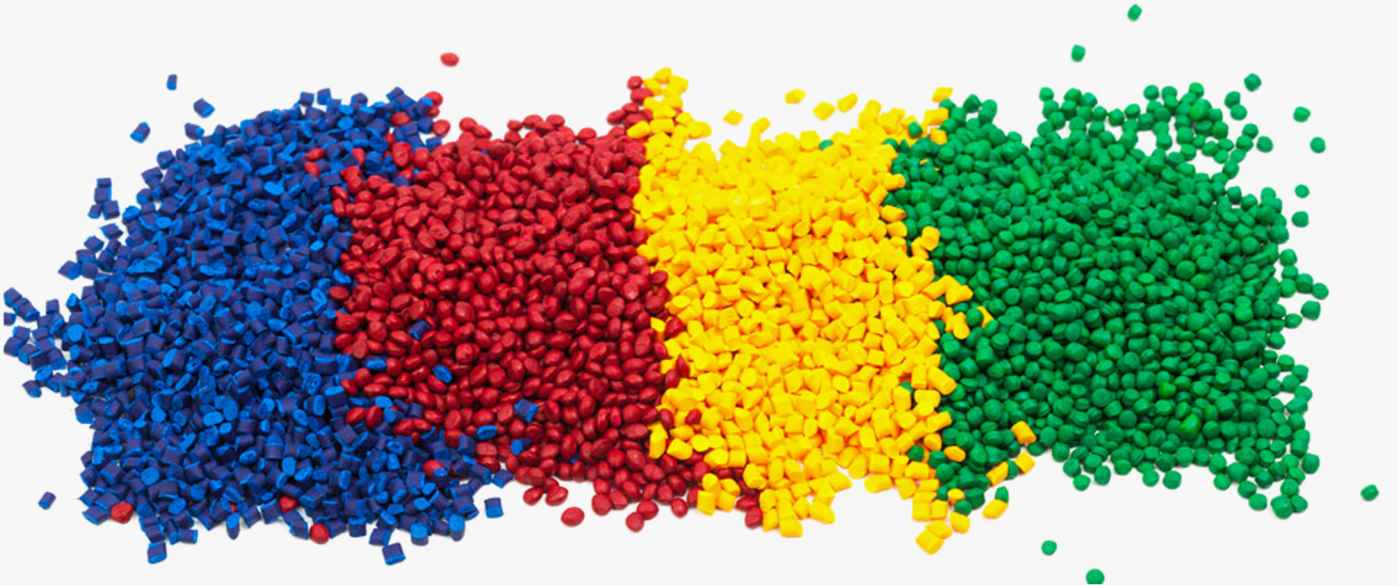

Eva Compound

Our factory, established in Erzurum in 2024, manufactures EVA slippers, sandals, shoes, and soles in accordance with international standards, producing **150 tons** of EVA compound daily in a **5,000 m²** closed area.

We are proud to be equipped with the latest technology and the most advanced machines in the field, allowing us to produce premium formulas with a solid control over our customers' specific requirements regarding color, hardness, and expansion ratio.

Features

- ▶ Good brightness and clarity
- ▶ Retains strength at low temperatures
- ▶ Maintains resistance to UV radiation and stress cracking
- ▶ Hot melt adhesive has waterproof properties
- ▶ Durability and low water absorption
- ▶ Vibration and impact absorption
